

ROTARY TILLER

Features:

- Multi purpose implement for Farm applications.
- Sturdy, versatile and economic machine combines the operations of ploughing, tilling and harrowing.
- Tractor three point linkage mounting with CAT I & CAT II Pins
- Drive is taken from tractor PTO shaft through cardan shaft.
- Specially designed blades from high carbon heat treated steel ensures full soil pulverization, mulching and mixing.
- Sturdy and adjustable leveling board controls pulverization and ensures proper ground level after tilling.

Utilities:

- Best suited for dry and wet land application; especially for sugarcane fields and paddy seed bed preparation.
- Stubbles and roots are completely cut and mixed with soil ensuring better mulching.
- Seed bed is ready with one or two passes unlike multi passes with conventional implements.

Specifications:
